SUMMARY

Data Science Engineering student in seventh semester. I turn data into decisions through pipelines, automation and Python analysis. I'm looking for projects where data drives real impact.

EDUCATION

Data Science Engineering (Undergraduate)

Politécnico Gran Colombiano
Currently in seventh semester

2023 - 2027
Bogotá, Colombia

EXPERIENCE

Junior Data Analyst

Paynet

September 2025 - Present

Bogotá, Colombia

- Data modeling and ETL processes for integration between internal systems.
- Development and maintenance of data pipelines in Python.
- Design and maintenance of dashboards in Power BI and Apache Superset for business areas.
- Building AI agents with LLMs: prompt design, tool integration and skills orchestration.
- Automation of internal processes with Python and n8n flows.
- Development of internal scripts and tools to optimize operational tasks.

TECHNICAL SKILLS

Programming languages	Python, SQL, R, Java
Databases	PostgreSQL, MongoDB, ClickHouse
Pipelines and Big Data	Apache Spark, Apache Airflow, Apache Kafka, Debezium, Iceberg, dbt
Business Intelligence	Power BI, Apache Superset
Cloud and infrastructure	Docker, Cloudflare Workers, GitHub Actions
Automation	n8n, scripts en Python, agentes de IA con LLM
Growing in	Machine Learning, Inteligencia Artificial, Investigación aplicada

SELECTED PROJECTS

Personal Portfolio

luisanaruggia.github.io/portfolio/#/project/dev1

Interactive personal portfolio in React + TypeScript with 3D animations, force-directed concept graphs, LLM-powered chat assistant and ES/EN multilingual support. Static frontend on GitHub Pages, serverless backend on Cloudflare Workers + Groq.

Stack: React, TypeScript, Vite, Tailwind, Cloudflare Workers, Lottie, Web Audio API
